Deployment

Happy ...

As an user, I will get an email notification from the app/persona if I haven't made an entry in five days.

As an user, I can set a time for the entry to have the app feature it as "top entry".

Extra Happy ...

As an user, when I create/edit an entry, I am presented with a rich text editor (markdown).

💬 1

As an user, I can see a diary persona/character based on my entries' mood analysis. Eg: the persona will grow darker with more negative entries.

As an user, when I click on the persona, it shows a speech bubble of happy/sad status.

As an user, the persona will encourage me if the mood has been bad for a while.

≡ ☑ 13/13

As an user, I can view my entries.

👁 ☑ 0/4   Y

As an user, I can set the entry as public.

As an user, when I add an anonymous entry, I am presented with a user agreement.

As an user, I can add a new entry.

👁 Y

As an user, I can only edit an entry created on the same day.

💬 1

As an user, I can delete an entry at any time.

As an admin, I can edit the mood of the picture in the database.

☰ ☑ 4/4

As an user, my entry's background is set randomly from an API.

☰ ☑ 0/2 VO

As an user, my entry's background is set based on the mood analysis. Eg: if it's happy, a sunny background image. If it's sad, a rainy background image.

As an user, my entry is analyzed and categorized by the mood of the content.

☰ 📎 1 ☑ 6/6

Start applying Sentiment API

🕐 24 Sep

As an user, when I view an anonymous entry, I should not be able to see personal sensitive data.

As an user, when I add a new entry, I can upload images as well.

👁   VO   Y

As an user, I can set the background manually by picking from a default selection of coloured backgrounds.

👁   Y

Go through all renders/redirects in all files to make sure they are using path helper and not direct url
